

## ANGLIAN WATER – INFORMATION

As part of our work, there will be a small number of road closures, and other traffic management measures – such as temporary two-way traffic lights – over the coming months. Advanced warning signs will be put in place to notify residents and, where needed, diversions will be created. The closures will last no more than a few days.

Please visit our dedicated webpages, [here](#), for further information – including a map showing the locations of the planned roadworks. Alternatively you can see all the planned roadworks in your area, including work being carried out by other organisations, by visiting the One Network [website](#). You can also register for updates about our work by clicking on the ‘Keep Me Informed’ tab on our In Your Area pages, [here](#).

If you have any questions, or would like further information, please reply to this email.

Thank you,

Strategic Pipelines
